EDUCATION

Lehigh University, P.C. Rossin College of Engineering and Lehigh College of Business Expected May 2028
B.S. Integrated Business & Engineering: Major in Biocomputational engineering, Minor in Philosophy GPA: 3.80/4.00

- Coursework: Data Structures & Algorithms, Systems Software, Business Analytics, Marketing, Entrepreneurship.
- Honors: \$200K Lehigh Merit Scholarship, Eagle Scout, Diana Award for Changemakers, Duke of Edinburgh International Award.

EXPERIENCE

Mesh (YC W25) May 2026 – Present
GTM (Go-To-Market) Engineer San Francisco, CA

- Increased Mesh's search visibility by 50% by redesigning its website and product messaging based on analysis of 50+ competitors.
- Reduced founder content creation time by 67%, by building a LinkedIn automation workflow using Slack, Canva, and OpenAI.
- Enabled 4 LinkedIn posts per week and generated 25K impressions on a top-performing post among CFO, CAO, and CPA audiences.
- Redesigned onboarding user flow, leveraging QA findings and PostHog data to reduce manual work by approximately 40%.

Lehigh Product Society Jan. 2026 – Present
Founder & President Bethlehem, PA

- Founded Lehigh's first Product Management community and scaled it to **50+** students across computer science and business.
- Lead and designed 8-week fellowship program teaching students the product lifecycle, UI/UX, PRDs culminating in product pitches to senior PM's at Adobe, Uber, Capital One, Microsoft and LinkedIn.

Bouken Capital Nov. 2025 – May 2026
Venture Capital Analyst San Francisco, CA

- Evaluated **20+** early-stage AI and SaaS startups by analyzing customer pain points, product-market fit, competitive differentiation, and monetization strategies to assess long-term product viability and investment potential.
- Conducted market and competitive research to produce investment memos evaluating product strategy, market positioning, user value proposition, growth potential, and business fundamentals to inform investment decisions.

Rebee Health Jun. 2025 – Aug. 2025
Product Strategy Intern, Lee Iacocca Business Scholar Singapore, Singapore

- Built AI-assisted outreach automation with JavaScript, Google Apps Script, Claude Code, and Google Sheets, increasing demo conversion by 4 percent while supporting go-to-market execution.
- Translated clinician user interviews from hospital pilots into product requirements documents, acceptance criteria, and edge cases for Rebee AI and patient comments, prioritizing **2** features.
- Partnered cross-functionally with the CTO and engineers via Git, Jira, and Slack to test releases, file reproducible bugs, and improve SaaS product stability during clinical pilots.

PROJECTS

Rodney - Your Research Buddy (*Major League Hackathon*) | React, Node.js, DigitalOcean AI, OpenAI SDK, arXiv Jul. 2026

- Built an AI research companion that lets users import arXiv papers, highlight complex passages, and receive context-aware explanations streamed in plain language.
- Designed personalized onboarding, follow-up chat, simplified explanations, and browser-based reading history to make scientific research more accessible without replacing the primary source.

Evento AI (*AWS Regional Hackathon*) | AWS Amplify, Textract, Bedrock, HTML/CSS, Gemini API Oct. 2025

- Built AI event assistant using APIs to parse unstructured GroupMe messages into calendar-ready dates, times, and locations; designed UX review flow for users to validate automated outputs.

FlowModoro | JavaScript, HTML/CSS, Local Storage May 2025

- Built productivity web app with customizable focus intervals, task tracking, persistent state, and product analytics hooks to measure feature usage patterns and support future experimentation.

Banding People Together | Consulting Analyst, Lehigh Consulting Group Oct. 2024 – May 2025

- Evaluated the effectiveness of integrating large language models (LLMs) into the client's business model through prototyping and supporting a strategic investment decision tied to digital transformation.
- Formulated data-driven recommendations to streamline operational processes and enhance performance metrics.

SKILLS

Product: Product Strategy, Roadmapping, Prioritization, User Research, User Interviews, Product Requirements Documents (PRDs), Product Lifecycle, Experimentation, A/B Testing, Analytics.

Technical: SQL, Data Visualization, HTML, CSS, Git, REST APIs, Python, Java, JavaScript, TypeScript.

Software: Jira, Miro, Figma, Git/GitHub, Claude Code, Codex, Cursor, Airtable, Confluence, Microsoft Suite.

Interests: YC Startups, Content Creation (YouTube, Instagram), Camping, Solo Travelling (Kenya, Singapore, Malaysia), Film.
